DECLARATION UNDER 37 C.F.R. § 1.131

We, Jeffrey S. Doyel, D. Allan Shoup, James J. Wagner, and Jennifer A. Ducey, declare that:

- 1) We are the co-inventors of the subject matter described and claimed in the patent application identified above.
- 2) Prior to October 3, 2003, we had conceived and reduced to practice the invention as described and claimed in the subject application in the United States as evidenced by the following:
 - a) At least as early as November 19, 2002, we conceived the invention that shows the computerized system and method for generating and satisfying health maintenance item expectations in a healthcare environment. Conception by this date is evidenced by the expectation management design document, which is attached as Exhibit A and dated November 19, 2002. Due diligence from conception to the filing of the application is evidenced by the Visual C++ source code for the user interface component of the claimed

invention, which is attached as Exhibit B and dated June 11, 2003. Due diligence condition to subsequent reduction to practice and filing of the application is further evidenced by, a screen print of revision tracking software tracking when the last status change for artifacts of the claimed invention occurred, which is attached as Exhibit C, the screen print illustrating the last status change of the claimed invention occurring on June 11, 2003.

- b) Between at least as early as June 17, 2003, and December 31, 2003, we worked with in-house and outside counsel to prepare and file the present patent application on December 31, 2003.
- 3) We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the patent application or any patent issued thereon.
